Cornellà de Llobregat

SKILLS

- Shaders
- Optimization
- Asset Implementation
- Rigging

SOFTWARE

- Unity
- Maya
- Blender
- RenderDoc
- Photoshop
- Substance Designer

LANGUAGES

- English
- Spanish
- French
- Catalan

WORK EXPERIENCE

Pipeline TD

Mar 2026 – Present

Mago Production

Develop the project's production internal tools, connecting tracking, asset management, and DCC software into a single workflow. Python services and artist-friendly plugins.

- Build and maintain the production internal tools for artists across the studio, focused on automation and workflow efficiency.
- Developed a Python pipeline service for production tracking, integrated with Kitsu.
- Built artist-friendly tools, reducing friction with technical aspects of the production.
- Integrated Photoshop, Toon Boom Harmony and Blender into a unified workflow.

Technical Art Teacher

Nov 2025 – Jul 2026

LEVEL UP [Game Dev Hub]

Teaching technical art for games in Unity, from shader fundamentals to optimization and custom render features. Mentor students throughout the full art-to-engine workflow and final master's project.

- Teach technical art for games in Unity: shaders, optimization, and best practices.
- Design course material and hands-on projects covering the full art-to-engine workflow.

Technical Artist

Dec 2022 – Aug 2025

Petoons Studio

Technical artist across multiple shipped titles including well known IPs, covering shading, rendering performance, character art tech, and the art workflow the teams worked with.

- Developing shader sets under strict Switch and mobile GPU budgets.
- Responsible for rendering and memory optimization – frame profiling, batching/GPU instancing, impostors.
- Rigged and skinned characters in Maya. Set up in-engine cloth and rigid-body physics; built particle VFX.
- Defined the studio art integration workflow and automated base-prefab creation to remove shader/material mismatches.

EDUCATION

L'IDEM Barcelona

Oct 2017 – Jun 2021

International Bachelor degree in 3D Animation
